Startup Guide

1. How to connect

Connect the smaller micro USB plug to the keyboard then connect the larger standard USB plug to the computer. When the keyboard is successfully connected to the computer, driver installation will begin automatically.

2. Changing the keyboard settings for each OS

Settings for Windows 8 : Fn key + []

Settings for Mac OS X : Fn key + []

3. Switching modes

Press [] to change to keyboard mode, press [] to change to touch panel mode.

Press [] to enter sleep mode.

4. LED backlight settings

The LED backlight will automatically turn off after not using the keyboard for 5 consecutive minutes, it will turn back on again when touched.

Switch on/off the backlight by touching the keyboard with 10 fingers.

Press [] + [] to turn on/off the LED backlight feedback.

Press Fn key + [] + [] to change the LED backlight brightness level.

5. Restoring settings after power loss

Keyboard settings and LED backlight settings will be automatically restored if you previously saved the settings. If you didn't save the settings, you have to set them up again.
